

# The UK's most eco-friendly bottled water

## Carbon Neutral

Belu Natural Mineral Water is reducing its impact on the climate by bottling water in the UK, converting to wind power and offsetting all remaining CO<sub>2</sub> emissions. As a result, Belu is the first bottled water not to melt the ice caps. **The penguins approve!**

## 100% profits to clean water projects

A quarter of the world's population does not have access to clean water. To help, Belu provides clean water to one person for one month for every bottle sold! We have thus far funded clean water projects in India, Mali, Madagascar and Bangladesh.

## The UK's first compostable bottle

Belu's "bio-bottles" are made from corn and can be recycled or commercially composted back to soil in just 8 weeks - a million times faster than normal plastic bottles!

## PVC free bottle caps

Belu uses bottle caps with PVC free liners. This way we reduce unwanted chemicals escaping into our water and environment.

## Award winning water

Belu is no ordinary 'ethical' water. We visited every mineral well in the UK to find our pristine sources. We also engaged London's top design firm to create these elegant bottles which have won numerous awards including "Brand Packaging", "Shine" and "Creative Awards UK".

## Drink socially responsibly

By stocking Belu you demonstrate your company's commitment to the environment, increase employee and customer loyalty and contribute to a cleaner planet.

## Still and sparkling Belu is available in:

330ml x 24 glass bottles

750ml x 12 glass bottles

500ml x 24 compostable bottles still water only
